

IJP Roadmap

ICAT F2F October 2016

Brian Ritchie

Recent developments

- New GUI
 - TopCAT plugin (AngularJS)
 - RESTful interface to IJP server
 - Original GWT GUI still part of server, but won't be developed further

Current status

- One active customer, Octopus (CLF)
- Test system in place (ingest, jobscript development)
- Not yet in production
- Batch connectors
 - Torque
 - Unix batch (for demos/tests)
 - Platform LSF (incomplete)

Future development

- Improve batch system brokering
- Add batch requirements to job types (e.g. requires GPU)
- Support versioning of datasets
 - Specific requirement from Octopus – post-ingestion modifications
 - IJP GUI should only show latest version of each dataset (custom results filtering)
 - Version management separate from IJP, but may be developed as jobs
