

Roadmap python-icat

Rolf Krahl

ICAT Meeting @ 11th NOBUGS, Copenhagen, October 2016

- Not too much development activity at the moment.
- While python-icat is intensively used at HZB, it currently does all what I need it to do.
- Development at the SOAP interface of ICAT has stalled.
- Only sparse feedback from other users.

⇒ no feature request open.

- Last release versions:
 - 0.8.0 2015-05-08
 - 0.9.0 2015-08-13
 - 0.10.0 2015-12-06
 - 0.11.0 2016-06-01
 - 0.12.0 2016-10-10
- Most important changes:
 - Improved versions of icatdump and icatingest. icatingest is now suitable as a general ingestion tool, including file upload.
 - Improved Query class.
 - Better handling of SSL server certificates.
 - Improvements in the icat.config module.
 - Unified handling of server errors from ICAT and IDS.
 - Compatibility with new ICAT and IDS versions.
 - Use Sphinx to build documentation.
 - Testing.
 - Bug fixes.

- Improve documentation.
- Keep compatibility with upcoming ICAT and IDS versions.
- Still waiting for feature requests from users ...
- Drop support for ICAT 4.2?
