What is ICAT Manager

ICAT Manager is mainly an administration tool for ICAT

Technologies

- Standalone Java 7 software

- Uses Eclipse RCP framework

- ICAT Java client generated on the fly using JAX-WS

Features

- Install once, update online

- Independent of the version of ICAT (needs ICAT >= 4.2.0)

- Create, Read, Update and Delete any entity

- Pagination, sorting and filtering on any field

- Multi-entity update
