ICAT Setup

Tool to manipulate, users, groups and rules

Steve Fisher / RAL

<dr.s.m.fisher@gmail.com>

What is it?

- The program has the ability to add, list and delete users, groups and rules.

- Valid commands are help, adduser, addrule, listuser, listrule, listgroup, deluser, delrule and delgroup.

- All the list commands will take an extra parameter to match against the name of a user, the name of a group, or the name of the group to which a rule applies. The parameter may contain SQL style wild cards.

Some commands

adduser ingest crudall

addrule crudall all CRUD

addrule null Investigation <-> InvestigationUser <-> User <-> User [name = :user] R

listuser in%

deluser 15

listrule guest
