

Topcat Roadmap

ICAT F2F November 2017

Brian Ritchie

Recent developments

- 2.2.1
 - Set limits for cart (no. of files / total size)
 - Prepare data / check status moved to background to improve cart submission response
 - Improved getSize performance
 - *DB migration required*
- 2.3.0
 - Support for plugins
 - File uploads
 - Moved page content out of lang.json
 - Allow custom HTML on logon page
 - Can cancel/restore downloads from admin interface
- 2.3.1 – 2.3.6
 - Minor fixes (and distro screwups 😊)

Work in progress (2.4.0)

- More robust startup
- Single-tier download buttons in Browse
- “Info” button to toggle metatabs view
- Improved cart caching
- Improved calculation of file sizes / counts
- Downloads no longer marked as Expired when ICAT/IDS returns a 404
- Topcat_admin tool (inspect/prepare/expire downloads)
- Describe search limits in interface; search interface more configurable
- Separate ICAT/IDS urls for Javascript and Java components; separate download type URLs
