

ESRF Development Status

Alex de Maria Antolinos
Software Engineer
Data Manager@Data Analysis Unit
Software Group
ESRF
20.11.1017

Data Policy Short Summary

- Acceptance of the data policy is a condition for the award of beam time
- ESRF will automatically collect data and metadata for all experiments from all beamlines (including CRGs)
- ESRF is the custodian of the raw data and associated metadata
- ESRF will store metadata in a metadata catalogue (**ICAT**)
- Experimental team has sole access to the data during the so-called embargo period of 3 years; request to extend the embargo period can be made
- After the embargo ESRF will make the data “Open Access”
- Proprietary data belong by default to the PI and are not archived unless explicitly agreed

Data Policy Short Summary

- About data and metadata
 - Only keep **data generated** at the ESRF
 - Data must be in a **format** the ESRF can read
 - Data must be traceable and verifiable as coming from the ESRF
- After the embargo the data will be released under the license CC-By-4

CryoEM						

*Techniques covered - lists which techniques are currently concerned by the Data Policy

*Metadata collection - status of metadata collection and storage in metadata catalogue for the listed techniques (orange = planned / in progress, green = implemented, grey = not planned / implemented yet)

*Data archiving - status of long term archiving in tape library (green = data are being archived for 10 years in tape archive)

*Open access of data - indicates if data is open access (green) or still under embargo (red), or no data archived (grey)

Architecture Overview

Data: from Beamline to Tape

PRODUCERS

CONSUMERS

Metadata

How and where metadata is stored?

NeXus

ICAT

- HDF5 as a mirror of ICAT on the local beamline file system
- Following the NEXUS convention

```

Graylog

Central logging system

- Centralize all logs
- Open Source
- Monitor and alert
- Stats
- Implementation in Java for all major logging frameworks: log4j, log4j2, java.util.logging, logback, JBossAS7 and WildFly 8- ...

Next Developments

- **DOIs**
- **More protocols to download files**
- **E-logbook and its integration with ICAT**
- **Improve/evolve TopCAT**
 - Searchable
 - More attractive

Challenges

- **Attract users with TopCAT**
- **Keep pushing the implementation on the beamlines 10/year**

Thanks!
